MOBILE STAND FOR FRAMING CAMERAS

Model 1500

- **Purpose-built:** Designed for the Model 560 and 580 Framing Cameras
- **Configurable:** Height, tilt, pan, and fine adjustment options available
- **Heavy-duty:** Steel and aluminum construction, approx. 250 lbs. (115 Kg)
- **Stable:** Adjustable leveling jacks secure cart into place
- **Adjustable:** Nominal optical center is 39" high, and electric drive height adjustment (adds up to 13" extra height), plus manual incremental fine side-to-side adjustment. There is also an available front-to-back adjustment option.

Model 1500 Camera Stand shown with Model 580 Camera

The **Cordin Model 1500** mobile framing camera stand was developed specifically for the Model 560 and 580 framing cameras. The sturdy design accommodates both the camera as well as the Cordin Gas Control Box (required for gas turbine driven rotating mirror camera systems), and enables easy movement and management of the camera.

The Model 1500 includes a separate, detached mobile stand for the camera's PC control workstation which allows full flexibility in controlling the camera from a remote location if desired.

Separate PC Control Station (included)

OPTIONS / ACCESSORIES

Model 1500-01 Height Extension: Raises camera optical center to 49" high (std) or custom height

Model 1500-02 Tilt Mount: Allows camera to tilt in four directions and rotate up to 180°

Model 1500-03 Front/Back Adjustment Plate: Adds fine front/back adjustment capability in addition to the (standard) side-to-side fine adjustment

110 or 220 Volt Compatible Versions

Faraday Cages for PC, Gas Control Box, Other Devices

Custom Configurations Available
